**Subject:** Microsoft Settlement

Dear Sirs,

I disagree strongly with the proposed settlement of the Microsoft case. It is a travesty that they, a corporate entity, is allowed to effectively kill other corporate entities, be found guilty and just play legal and political hardball to get off without any realistic punishment or even serious oversight.

It is as if a murderer was given a slap on the wrist and a reloaded gun at his trial. The Department of Justice has a responsibility to enforce \*all\* of the laws that it was created to enforce, not the ones that are politically expedient.
